Buying or Selling a Business? Call Oilheat Associates First
Whether you want to sell your company now or next year, you need to prepare now to achieve your company’s maximum value. Oilheat Associates will help you prepare. Oilheat Associates has a track record of successful transactions that provided the seller with a favorable outcome; often beyond that which was expected. Outcomes like that don’t just happen, it takes expert strategic planning. Let Oilheat Associates’ team of experts guide you to reaping the maximum rewards you have earned through so many years of hard work. 516-679-4686 • oilheatassociates.com • propaneassociates.com

Allanson’s Industrial Gas Ignitors
Looking for an Industrial Gas Ignitor? Allanson’s 2260 series of Industrial Gas Ignitors are in stock and ready to ship. Versatile and light-weight, the 2260 Ignitors are available in both 120 and 230 volt options. With four different types to choose from, it will make installation quick and effortless for any application. Order your energy efficient 2260 Ignitors today! Allanson, your trusted experts of quality ignitors and transformers for over 90 years. Visit us at www.allanson.com.

For Every Fuel System Problem
...An FPPF SOLUTION
Treating a fuel operated system involves much more than pouring an additive into a tank. Our “Preventative Maintenance Program” is a necessity whether you are operating/storing fuel for your heating system or motor vehicle. Proper maintenance:
• PROTECTS year round
• PREVENTS fuel line freeze-ups
• CONTROLS waxing & gelling
• DISPERSES water in heating oil & kerosene
• PREVENTS corrosion in the entire fuel system
• ALSO AVAILABLE in 1 gal & 55 gallon drum
FPPF additives are your energy assistance programs in a bottle.

Measure, Analyze and Manage Readings With the DC710C1 Combustion Analyzer from TPI
Analyze combustion efficiency with the TPI DC710C1, your smart phone, & free TPI app. With the DC710 at the stack, you can remain at controls with your phone and have a report ready to submit to your client. Reports include GPS location, and time/date stamp— invaluable for providing proof of readings and saving time. Calculate CO₂, CO Air Free, Excess Air, and Efficiency. Bluetooth, USB input, magnet and hook mounting, rechargeable battery, probes, and case.
DC710C1 $449.95 Suggested Trade. • www.testproductsintl.com.

Ecestyle Steel Panel Radiators from QHT
Ecestyle Radiant Panels with their decorative sides and grills, beautiful enamel finishes and rounded edges, supply exceptional radiant heat with style. Ecestyle Panels with their integrated thermostatic valve, clamp mounting brackets, and bottom connections are easy to install and operate. Ecestyle radiant and convective heat panels are the perfect compliment to standard efficiency and condensing boilers.

Oventrop “R-Tronic” Wireless Thermostatic Radiator Control
The Oventrop “R-Tronic” wireless thermostatic radiator control, controls up to three separate operators. It is daily and weekly programmable in either Fahrenheit or Celsius. Both the thermostat and the operator have a battery life of up to two years. The operators are available with universal mounting connections and do not require any tools for installation. Visit oventrop-us.com.

Wohler USA’s NEW A 450 Flue Gas Analyzer
An affordably priced flue gas analyzer with rugged yet compact housing, a touch screen monitor and advanced sensor technology. Provides the flexibility needed for applications such as checking furnace efficiency, boiler tuning, and water heater checks. The Wohler A 450 also offers transmission of all measurement data to a mobile device (smart-phones, tablets by Android and iOS) per Wireless LAN. These devices can then display the measurements as numerical values or as a graph in the Wohler A 450 app, and provides the option of reading measurements already taken and also the ability to take new measurements.

Enhance Performance of Ductless Heating/Cooling, PTAC & Stoves/Fireplaces
Ultra quiet, AireShare™ Room-to-Room & Level-to-Level transfer fans distribute heated/cooled air through interior walls/floors to uncomfortable rooms. Move air to rooms not directly served by ductless heating/cooling, split system, PTAC & window A/C. Great for electric baseboard, stoves & fireplaces. Move air up or down for application flexibility. Destratify stagnant air & improve ventilation rates inside homes, condos & hotel rooms for greater comfort. Hardware and Plug-in models. Tjemlund Products, Inc., 800-255-4208 • tjemlund.com

Williamson Centennial High Boy & Low Boy Oil Furnaces
Built with an industry leading 10-gauge primary heat exchanger for durable, quiet performance expected by homeowners. Designed for easy installation, the Centennial includes an A/C fan center and factory-wired plug-in burner connections. The preformed slide-out combustion chamber, dual spring-loaded clean-out ports, with observation opening, and test port, make inspection and service fast and easy. Direct fit cased cooling coils are available for all Centennial oil furnace models. 800-736-2378 • williamson-thermoflo.com

Ascent™ Plus Combi Oil Boiler 91.3 AFUE Polypropylene Vent (Sidewall and Chimney) & No Tank
Non-condensing boiler that builds on the Ascent Combi benefits, with higher efficiency and polypropylene venting. A great replacement option for tankless coil oil boilers and most gas wall hung boilers (90.3 AFUE), with no complexity or parts support issues. Lifetime limited warranty – see actual warranty for details. To double your savings or for installations that already have a hot water tank or have multiple zones, consider upgrading to the System 2000 Frontier, 90+ Resolve™, Resolve™ RT or Accel CS™.

Roth Double-Wall Oil Storage Tank
- Leak-proof and will not corrode
- Outer tank holds 110% of inner tank volume for maximum protection
- Up to 50% lighter than conventional steel tanks
- Can use for heating oil, diesel and bio fuels
- Compact, economical design
- 5 sizes available – multiple tank installation configurations
- Quality control and testing exceeds industry standards
- Up to $2 million clean-up policy

Thermo Products Oil and Gas Furnaces
Thermo Products offers their premium Thermo Pride brand oil and gas furnaces as well as their economy Spirit brand oil furnaces. Choose the brand that is right for you! Models available with either ECM or PSC blower motors.

For complete product details and to find a distributor, go to thermopride.com.

Purmo Fan Convectors From QHT
VIDO wall mounted, fan convectors are quiet, compact, attractive & efficient. Their high heat outputs at low flow temperatures enhance the efficiency of low mass and condensing boilers. VIDO’s controller varies fan speed based on deviation from thermostat setpoint and provides day/week setback programs. The optional cooling coils rapidly cool spaces when connected to a chilled water supply. VIDON can be quickly installed with little disruption or mess with its single piece casing.

With high cost of energy today, why not convert that one pipe steam heating system to a two pipe hot water system?
One of the options is the Oventrop single entry valve. If the steam radiators have push nipples across the top sections of the radiators then the valve will work fine. With Oventrop’s full line of direct mount or wall mount thermostats, you are able now to control the heat output of each radiator, making zoning simple in an old structure. The valves are available with either copper or PEX connections, making the installation simple. For more information on this valve or any of our many hydronic valves, please go to oventrop-us.com

Tauch-Rohr Single Pipe Radiator Valve—Converting One Pipe Steam System to Two Pipe Hot Water System With Non-electric Controls

Oventrop “Series QV” Automatic Flow Balancing Radiator Valve
The Oventrop “Series QV” is an automatic flow balancing radiator valve. It has an adjustable flow setting range from 0.05 to 0.75 GPM. The integrated replaceable strainer enables reliable operation. An easy-to-use setting key prevents unwanted tampering with the valve setting. The “Demo-bloc” service tool facilitates complete maintenance and replacement without draining or shutdown of the system. Visit oventrop-us.com

No-Clog Dryer Duct Booster® Meets UL 705 DEDPV & IRC-2015 Requirements
Dryer Duct Booster Saves significant energy—reduces drying times 50% or more. Reduces lint build-up, dust & fire hazards by maintaining proper velocity in duct runs up to 150 equivalent feet. Features the Lint Blitzer™ material handling wheel & 5 year no-clog guarantee. 50 watt motor is not exposed to heat, lint or moisture. Includes 115 VAC cord - automatic operation. Suitable for gas and electric dryers.
